The pit jack lifts up to 16.5 t. The pit jack with 750 mm stroke runs on guide rails located underneath. Compressed-air rapid control provides fast movement of the piston rod when there is no load. The equipment also includes an air motor with hand control for lifting the piston rod under load.

PRODUCT DETAILS/ACCESSORIES

1-stage telescopic, rail-guided, floor-running

Description:
Automatic pit jack
with pneumatic motor and fast control
Specifically for wheel/brake works in conjunction with axle lifting beams and support systems for trucks and buses with 16.5 t load capacity

Control:
- Efficient fast control for UP and DOWN movement Integrated as standard
- Precision, user-friendly, pneumatic manual control cylinder with magnetic bracket for convenient and flexible quick stroke andload lifting with enlarged view into operator radius
- Delicate and precision lowering of the pit jack with tried (>&)> tested system with integrated dead man's control

Design:
- Precision floor-runnable, rail-guided pit jack for easy movement (needle bearings included as standard) of built-on units, including while loaded
- Telescopic carriage for precision adjustment of pit jack lane width to fit the rails in the work pit
- Precision-guided track rollers (flange guided)
- Optional rollers for U profile or wall-guided with flat steel possible
- Secure jack holding brake in transverse direction across the work pit
- Almost unobstructed passage through the work pit thanks to floor-running carriage
- Punch mount can be increased by max. 2 x 200 mm (option for very deep pits)
- Integrated inspection window for checking oil quality and oil quality of the pit jack
- With its non-slip coating the chassis can be used as a secure working platform for ergonomic reasons
- Corrosion-resistant piston rods thanks to self-lubrication
- High-quality powder-coating protects against corrosive liquids and elevates quality look and feel on a lasting basis
